Ideation Phase
Brainstorm & Idea Prioritization Template

Date	1 October 2026
Team ID	SWTID-2026-9874
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

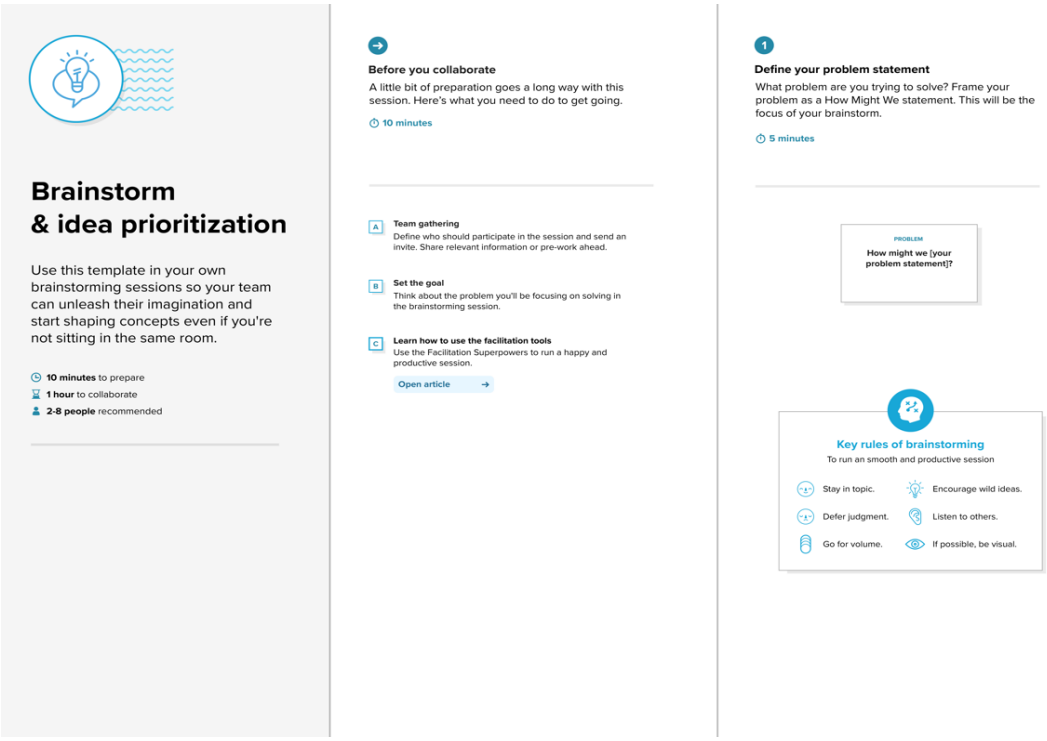

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Service Desk Agents need to create complete and accurate Incident records, but manual data entry can result in missing, inconsistent, or incorrect information.

Step-2: Brainstorm, Idea Listing and Grouping

Person 1 — Ideas

- **Idea 1**
  Make important Incident fields mandatory.
- **Idea 2**
  Automatically validate Incident information before submission.
- **Idea 3**
  Display clear error messages for missing information.
- **Idea 4**
  Automatically set Incident values based on Impact.

Person 2 — Ideas

- **Idea 1**
  Make critical Incident fields read-only when required.
- **Idea 2**
  Prevent users from entering invalid Incident information.
- **Idea 3**
  Automatically control fields for High Impact Incidents.
- **Idea 4**
  Guide users while creating an Incident.

Person 3 — Ideas

- **Idea 1**
  Prevent saving an Incident when required information is missing.
- **Idea 2**
  Prevent unauthorized changes to Incident State.
- **Idea 3**
  Validate Incident records during form submission.
- **Idea 4**

Person 4 — Ideas

- **Idea 1** Use UI Policies to control field behavior dynamically.
- **Idea 2** Use Client Scripts to automate Incident field values.
- **Idea 3** Use different Client Script types for different validation needs.
- **Idea 4** Combine UI Policies and Client Scripts for Incident data integrity.

GROUP IDEAS
GROUP 1 — FIELD VALIDATION:

- Mandatory Incident fields
- Save-time validation
- Required-field checking
- Error messages
- Prevent incomplete submission

GROUP 2 — AUTOMATION:

- Automatic Incident values
- Automatic Urgency update
- Impact-based behavior
- Automatic validation

GROUP 3 — FIELD CONTROL:

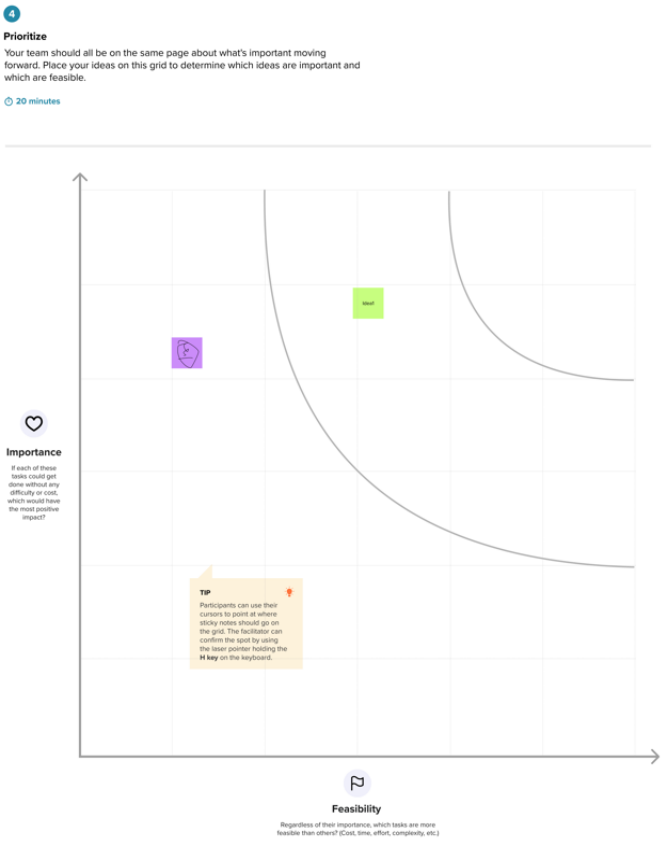

- Read-only fields
- Dynamic field behavior
- High Impact controls
- Mandatory Assignment Group

GROUP 4 — LIST / STATE CONTROL:

- Prevent State list editing
- Restrict unauthorized changes
- Allow State changes through form

- Validate list-based updates

Step-3: Idea Prioritization

HIGH IMPORTANCE + HIGH FEASIBILITY

1. Mandatory field validation

   Make Assignment Group mandatory for High Impact Incidents.

2. Automatic Urgency

   Automatically set Urgency to High when Impact is High.

3. Save validation

   Prevent saving a High Impact Incident when Assigned To is empty.

4. Read-only control

   Make Urgency read-only for High Impact Incidents.

5. State list restriction

   Prevent State changes through direct list editing.

HIGH IMPORTANCE + LOWER FEASIBILITY:

- Advanced automated Incident classification
- AI-based Incident validation

- Automatic Incident assignment using intelligent classification

LOWER IMPORTANCE + HIGH FEASIBILITY

- Additional information messages
- Extra user guidance
- Additional form customization

LOWER PRIORITY

- Custom dashboards
- Advanced reporting
- Mobile-specific Incident interface
